Jewelry Frame Art Kit

By ArtKits.com

1 Jewelry frame, predrilled
 11 holes on front (for knobs)
 4 on top (for ring holder hooks)
 2 on back (for hanging kit)
11 variety knobs with hardware
4 ring holder hooks with hardware*
3 chains with 6 small wires to attach to knobs
Hanging kit with wire
Black and white paint
Paint brush
1 Pen/screwdriver
Plastic sheet is needed for necklace making kit. Do not discard.

*The ring holder hooks have only one screw instead of 2, as this will allow you to gently rotate it as needed.

Artist tip: If you have a special knob(s) of your own, you may be able to swap as needed if they can use the same size screws.

Step 1 (Optional)

- Determine the color of your jewelry frame. All kits come with black and white paint and a paint brush. Use individually, mix them for different shades of gray, or don't use them at all. Frame should be fully dry.

Step 2 – Design

- Do not attach knobs in this step (attach chain first)

- Arrange the knobs as you'd like on the front. There is no "right way", it's only your way. Take a picture of your arrangement.

Step 3 – Attach chains

- The first three rows of knobs will have chains linked to them. Arrange the chains how you'd like.
Artist tip: chains should not be too tight. There should be a little wiggle room or "give" to hang elegantly.
- Using the small wires, thread one wire on one end of the last link or two of chain, and twist the wire around the screw.
- Do the same for the other side. It's ok to use an inner link of the chain so that it's not too tight or too loose .

Step 4 – Attach knobs

- Screw the knobs into their places, per your design

Step 5 - Attach ring holder hooks

- Using the included screwdriver (twist off the silver piece beneath the stylus to uncover the screwdriver. Pull out the screwdriver bit and flip for the Philips head.
- Attach the ring holder hooks on the top of the frame. (see pictures)

Step 6 – Attach hanging kit

- Using the screwdriver, attach the metal hanging hooks, and then add the wire, making sure that it is somewhat tight, but not too tight. Hang it up! I have mine right next to my mirror.

Step 7 – Hang frame and add your jewelry - For a lifetime!

Bonus Necklace Making Kit

1 glass cabochon with metal back
Adjustable necklace cord with clasp
Paint colors
Plastic sheet for creating "acrylic skins"
Drink straw
Single use super glue

Prepare

- Lay the plastic out on a flat surface
- Artist tip: this plastic will allow the paint to peel off when dry
- Cut the paint strip into individual pots, then open.

Instructions

1. Pour paints onto plastic, one color on top of the other
2. Use the back of the paint brush to swirl. Let paint settle and dry, or
3. Use the straw to blow paint slightly, then let paint settle and dry. Do not make paint too thin or won't peel easily.
4. Wait for the paint to fully dry.
5. Gently peel paint from the plastic.
6. Use your cabochon glass to identify which part of the paint you'd like to capture. Trim the paint skin and attach to the glass and metal back with glue.
